

Indian Party Lamp

You will need: scissors, tape, and one of: construction paper, foam food trays, cardstock, 1 or stiff plastic. Optional: ribbons for streamers, thread/cord for hanging.

1. Cut pieces from paper, foam, or plastic.
2. Lay out pieces, matching letters & numbers. (a-a, E-E, etc.)
3. Tape together.
4. Crease tape for crisp edges as you form 3D shape.
5. Add streamers if desired.
6. To hang, sew a thread or cord across the top of the lamp.

- Tips:**
- Print this pattern on your paper for fast and easy cutting.
 - Work flat as long as possible before forming the 3D lamp. It's easier to tape!
 - Cut designs in the squares for light to shine through (leave them empty or tape colored plastic behind the design before assembling the lamp).
